

Create a new repository

A repository contains all project files, including the revision history. Already have a project repository elsewhere? [Import a repository](#).

Owner *

 PGM-Panda ▾

Repository name *

/ RLE

✔ RLE is available.

Great repository names are short and memorable. Need inspiration? How about **automatic-computing-machine**?

Description (optional)

Learn how to use GitHub by developing a Run Length Encoding mini app

Public

Anyone on the internet can see this repository. You choose who can commit.

Private

You choose who can see and commit to this repository.

Initialize this repository with:

Add a README file

This is where you can write a long description for your project. [Learn more about READMEs](#).

Add .gitignore

.gitignore template: None ▾

Choose which files not to track from a list of templates. [Learn more about ignoring files](#).

Choose a license

License: GNU General Public License v2.0 ▾

A license tells others what they can and can't do with your code. [Learn more about licenses](#).

This will set  **main** as the default branch. Change the default name in your [settings](#).

You are creating a public repository in your personal account.
